

GRACE SOUKOU

Third-year data science student with strong skills in applied mathematics, statistics, and programming, using these to analyze data and build decision-support tools.

✉ grace.soukou@edu.univ-paris13.fr / 📞 07 84 89 59 00
🏠 Villiers-sur-Marne, 94350

EDUCATION

- 2023-2026 | Bachelor of Technology (BUT) in Data Science – Track: Statistical Exploration and Modelling (EMS) :
Université Sorbonne Paris Nord – IUT de Villetaneuse
 - Semester 5 GPA(Current) : 15.72/20
 - Data modelling in a statistical framework: 19.12 / 20

Key coursework:

Advanced statistical modelling • Data mining • Probability • Statistical methods for Big Data • Machine learning for AI • SQL & NoSQL databases • Big Data storage and extraction

- 2021 – 2023 | Intensive Preparatory Classes in Mathematics and Physics (MPSI) INP-HB – Yamoussoukro, Côte d'Ivoire

- 2021 | French Scientific Baccalaureate

PROFESSIONAL EXPERIENCE

Data Visualization & Business Intelligence Intern
CPAM Val-de-Marne | Apr 2025 – Jul 2025

- Designed Power BI dashboards for performance monitoring
- Automated and improved reporting data processing
- Structured and transformed decision-support data
- Contributed to a large-scale BI project involving complex datasets

ACADEMIC PROJECTS

Energy Consumption Analysis in France – Interactive R Shiny Application (2025)

- Data cleaning and multi-source data structuring
- Statistical modelling and trend analysis
- Interactive visualizations for decision-making

SQL Reporting from Relational Databases (PostgreSQL, Metabase)

- Complex SQL queries for indicator construction
- Dashboard and performance metrics creation
- Data analysis and interpretation

Statistical Modelling for Complex Data – Kaggle Challenge (SAE 6.01)

- Applied advanced statistical learning methods to high-dimensional data
- Implemented text mining techniques (TF-IDF, vector space model, LSA/LSI)
- Worked with large-scale data processing frameworks (MapReduce, Hadoop, Spark)
- Built predictive models and evaluated performance in a competitive Kaggle environment

OBJECTIVE

Pursue a master's degree that matches my academic path, reinforcing my quantitative training and building strong abilities in data analysis and modeling.

My site

Linkedin

SKILLS

Quantitative & Statistical

Statistical modelling • Probability & estimation • Data mining • Exploratory data analysis

Data & Decision Tools

SQL (PostgreSQL, MySQL) • NoSQL(DAO/ORM) • Power BI • Tableau • Metabase • Excel

Programming

R • Python • R Shiny • Java (basic) • HTML/CSS

Data Engineering / BI

ETL: SSIS / SSMS

LANGUAGE : English: B2

STRENGTHS

Strong analytical thinking • Ability to abstract and model • Academic rigor (scientific preparatory classes) • Autonomy • Teamwork

INTERESTS

Quantitative finance & data science • Technology watch • Reading • Fitness
